

SCMR REGISTRY

Data Access Application Review Score Sheet

OVERALL REVIEW

Provide an Overall Score to reflect your assessment of the project's 1) alignment with the SCMR mission, 2) impact, 3) feasibility, and 4) investigators.

Rate each of the 4 categories from 1-9 (1 being the best; 9 is the worst) and list the strengths and opportunities for improvement that influenced your score.

Project Name: _____

Overall Score: _____ (1 – 9)

Write a paragraph summarizing the factors that informed your Overall score. Your Overall score is not necessarily the average of individual category scores, but rather should indicate your overall assessment of the proposal:

SCORED REVIEW CRITERIA

1. Alignment with SCMR Mission: *To improve cardiovascular health by advancing the field of CMR.*

Projects that aim to advance the use of CMR for the diagnosis or treatment of cardiovascular disease should be given priority.

Increased weight may be given when:

- the project addresses a specific Request For Application (RFA)
- the project leverages the existing data within the SCMR registry

Score: _____ (1 – 9)

Strengths

-
-

Opportunities for Improvement

-
-

2. Potential impact: on the field and utilization of CMR.

Increased weight may be given when the project aims to generate data to support appropriate utilization of CMR, such as:

- demonstrating the association of CMR findings and prognosis
- confirming the findings from single center studies
- demonstrating or improving the diagnostic capability of CMR, particularly when a pathologic gold standard or appropriate hard clinical endpoint can be used for comparison
- studying utility in rare diseases

Score: _____ (1 – 9)

Strengths

-
-

Opportunities for Improvement

-
-

3. **Feasibility:** of the project based on Registry data available, work required by contributing centers, and resources available to complete the project.

Increased weight may be given when:

- Contributing sites have already agreed to participate in the project
- Project does not require contributing sites to collect new baseline data that is not already in the SCMR Registry
- Project does not require contributing sites to perform additional image analysis
- Project does not require contributing sites to collect additional outcome information that is not already in the SCMR Registry

Score: _____ (1 – 9)

Strengths

-
-

Opportunities for Improvement

-
-

4. **Investigators:** the team possesses the skills, expertise, and resources to accomplish the project.

Increased weight may be given when:

- PI has yearly milestones that can be reasonably met
- PI has a clear plan regarding the process for handling missing data and/or additional data collection, performing statistical and/or image analysis, and collaborating with multiple contributors
- PI has obtained funding to help facilitate the completion of the study
- PI contributes data to the SCMR registry, or PI has partnered with a contributing site
- PI has published prior SCMR registry studies as lead or co-author

Score: _____ (1 – 9)

Strengths

-
-

Opportunities for Improvement

-
-
